Re: NOTICE OF EX PARTE COMMUNICATION
WT Docket No. 10-4

Dear Ms. Dortch:

On May 25, 2010, Jim Wilson of Wilson Electronics, Inc. ("Wilson") had a telephone conversation with Julius Knapp, Chief of the Office of Engineering and Technology. The parties discussed the status of Wilson's proposal that the Commission adopt heightened standards for the certification of signal boosters for subscriber use in the wireless telecommunications services under Parts 22, 24 and 27 of the Commission's rules.

Mr. Wilson stated that wireless service subscribers in Rural America have a substantial need for mobile and in-building signal boosters. He stressed the need for a dialogue between wireless carriers and signal booster manufacturers, with the aim of reaching an agreement on equipment certification standards that will ensure that wireless subscribers have access to signal boosters that will not harm wireless network operations. Mr. Wilson informed Mr. Knapp that Verizon Wireless has been particularly uncooperative in that regard.

A copy of this letter is being filed in WT Docket No. 10-4 via ECFS.

Very truly yours,

Russell D. Lukas
